Jukebox-tv

Jukebox-tv is an interactive Tv show where viewers select their own videos, votes for the hit-list, chat and comment live on the show. Based on the incoming SMS'es, mails and call to the voice response system the system automically determines which Video to play next. When the video runs a lot of Gossip/trivia related to the artist/composer/theme will be shown in numerous ways. The system automatically selects which gossip bits to display next based on tags for the video shown.

The system can run in two modes, manual and automatic. When it is run manual you use the system to integrate all the gossip/sms, mms, e-mails with your Live elements, comments.

 In automatic mode you set up the system (which videos, clips to be available, which type of trivia, which type of gossip and which types of incoming data (SMS, MMS, e-mail, voiceresponse etc.), turn on the system and the produce the show, music videos, videoclips with elements of gossip, trivia and viewer selections and comments. The show runs until you have asked it to stop. ½ hour, 45 minuttes or 6 hours, that is all up to you.

The system has an advanced graphic generator that lets you animate and script all kinds of graphics and texts.

The system comes in different packages.

The full package consist of a complete system, Software: Jukebox, SMS module, E-mail module, Voice response module, Video server module, Hardware: Jukebox system, Videoserver system, Content: Musiv Videos, Gossip Trivia database, Different Graphic Packages. Just connect it to the net (to receive sms, mails and phone calls) and the system starts to produce Music Televison for ever or until you stop it. SD version or HD version your choice.

Depending on your set-up and frequency you can produce Music Television for less than 1.000€/1400$/hour (exclusive any music right payments).

Gonzoft Tv Animation is a technologically innovative company based in Denmark. Gonzoft makes systems to produce better and inexpensive TV-shows. You quickly discover the advantages: It means super-flexible programming. Make shows of any length and any frequency at very limited costs.
